OVERVIEW

Front end developer candidate, skilled in writing modern, well-structured, testable UI code. Experienced with Ionic, AngularJS, React, Riot.js, and Twitter Bootstrap, as well as vanilla JavaScript.

Self-motivated researcher and problem-solver, eager to continuously learn both broad concepts and the details of specific solutions to real problems facing users and developers.

SKILLS

JavaScript Ecosystem: *Advanced*

Produce readable, self-documenting code in well-organized modules. Experienced with popular frameworks, and eager in researching new conceptual knowledge. Solid command of build management with npm scripts and gulp.

CSS: *Advanced*

Create well-organized, performant classes and selectors that avoid specificity contention. Prefer SMACSS to BEM methodology.

Test-driven Development: *Proficient*

Familiar with the use of mocha, jasmine, karma, protractor. Familiar with types of tests and testing methodologies.

Written/Verbal Communication: *Expert*

Focused on writing clear messages on commits, in code comments, and as documentation. Concise, grammatical, easy to read.

EXPERIENCE

Thinkful.com

Student, December 2015 - Present

Improve front-end development skills by working with experienced mentors and engaging with other self-teaching peers.

- Complete projects designed to stretch multiple core competencies, from HTML ``<canvas>`` programming to framework details, dependency managers, and build steps.

GotPrint.com

Quality Control Agent, March 2012 – Present

Improve production quality without compromising productivity in a high-volume printing operation, balancing multiple competing priorities to ensure success.

- Self-teach JavaScript, Python, and SQL in order to prototype and apply workflow solutions
- Create and document issue-tracking processes from scratch.
- Lead data-driven effort to reduce plant-wide spoilage year-over-year.
- Standardize QA procedures and error reporting; write and maintain department Standard Operating Procedures

FedEx Office

Lead Production Coordinator, June 2010 – February 2012

Led print production operation during each shift. Managed time and resources to make sure all projects were complete on time and without errors.

- Led improvement in service quality metrics, including Voice of the Customer surveys
- Trained and developed team members in customer service, software competencies, and equipment operation and troubleshooting

Production Coordinator, September 2009 – June 2010

Center Specialist, May 2009 – September 2009

Customer Service Coordinator, June 2008 – May 2009

Worked on a team and independently to produce print jobs for walk-in customers and fulfill previously scheduled orders.

- Maintained inventory and purchasing for multiple areas of the store, freeing time previously spent among multiple team members, reducing supply shortfalls and improving job turnaround time
